

User Manual / Help Guide for HOD Users

Module: Add Class Subjects (Courses) and Map Faculty and students

Step	Task	Who
Step-1	Enroll Eligible Students into a Class	Admin/ Principal / Academic Section
Step-2	Add Courses for the class	HOD
Step-3	For Each Subject (Course) a) Map Faculty b) Map Students	HOD
Note: These three steps must be followed at the start of the semester for each class.		

After Student Enrolment into a class (by the Admin/Principal), HOD will be able to Add/Manage Subjects (Courses). After Adding Subjects, Hod will Map Faculty and Students for each Course.

To simplify adding subjects and mapping faculty and students, it is recommended to organize the data in the following tabular format:

- Subject S.No.
- Subject Code
- Subject Full Name
- Subject Short Name
- Subject Type
- Students to be Mapped
- Faculty to be mapped

Subject S.No.	Subject Code	Subject Full Name	Subject Short Name	Subject Type	Students to be mapped	Faculty to be Mapped

Let's Understand with an Example:

Example:

Consider, for a Class of 60 students, Student Admission Numbers ranges from 21XX1A0501 to 21XX1A0560.

Consider the Class has following Courses/Subjects:

S.No.	Course Code	Name of the Course	Type of Course
1	210501	Operating System	Theory
2	210502	Computer Networks	Theory
3	210503	Mathematics – II	Theory
4	210504a	Web Development using PHP	Elective
	210504b	Web Development using Python	Elective
5	210505L	Computer Networks Lab	Lab
6	210506L	Operating System Lab	Lab

Consider, the students have chosen the Courses (mapping) as follows:

- As mandatory, Subjects 210501, 210502 and 210503 each has all students of the class. (21XX1A0501 to 21XX1A0560).
- For Elective,
 - Students 21XX1A0501 to 21XX1A0540 have chosen 210504a.
 - Students 21XX1A0541 to 21XX1A0560 have chosen 210504b.
- For Lab Courses,
 - Both labs have all the students of the class. However, for feasibility and effectiveness, Both the labs are shared in 2 batches (groups: A & B).
 - Group-A Contains Students 21XX1A0501 to 21XX1A0530
 - Group-B Contains Students 21XX1A0531 to 21XX1A0560
- This means both labs will have twice the workload or classes (Instead of 3 lab hours per week, each lab will have 6 hours per week—3 hours for each group). For each group of the same lab course, the lab dates will differ, and even the diary entries may vary. Therefore, it is recommended to divide the lab course into two separate courses (with the same subject S.No.) for better management as follows.
 - 210505La, Computer Networks Lab (Group-A)
 - 210505Lb, Computer Networks Lab (Group-B)
 - 210506La, Operating System Lab (Group-A)
 - 210506Lb, Operating System Lab (Group-B)

Hence the Table would become (Considering sample faculty names):

Subject S.No.	Subject Code	Subject Full Name	Subject Short Name	Subject Type	Students to be mapped	Faculty to be Mapped
1	210501	Operating System	OS	Theory	21XX1A0501 to 21XX1A0560	Prof. Ram
2	210502	Computer Networks	CN	Theory	21XX1A0501 to 21XX1A0560	Mrs. Lakshmi
3	210503	Mathematics – II	M-II	Theory	21XX1A0501 to 21XX1A0560	Mr. Keshav
4	210504a	Web Development using PHP	Web-PHP	Elective	21XX1A0501 to 21XX1A0540	Dr. Hari
4	210504b	Web Development using Python	Web-Python	Elective	21XX1A0541 to 21XX1A0560	Mr. Madhav
5	210505La	Computer Networks Lab (Group-A)	CN Lab (A)	Lab	21XX1A0501 to 21XX1A0530	Mrs. Lakshmi, Mr. Vishnu
5	210505Lb	Computer Networks Lab (Group-B)	CN Lab (B)	Lab	21XX1A0531 to 21XX1A0560	Mrs. Lakshmi, Mr. Vishnu
6	210506La	Operating System Lab (Group-A)	OS Lab (A)	Lab	21XX1A0501 to 21XX1A0530	Prof. Ram Mrs. Sita
6	210506Lb	Operating System Lab (Group-B)	OS Lab (B)	Lab	21XX1A0531 to 21XX1A0560	Prof. Ram Mrs. Sita

Step-By-Step Procedure(s):

- HOD will be able to Add/Manage Subjects (Courses), Map Faculty and Students, only after Admin/Principal Enroll students into a class.
 - If the Students are Enrolled into a class, “Manage Classes”, “Map Faculty” and “Map Students” Buttons will be displayed.
 - If the Students are NOT Enrolled into a class, “Students Not Enrolled” Message will be displayed.

Steps to Add Course for a Class (by HOD)

- Select “Manage Classes” option from the Menu
 - This page will show the List of all Active Classes (Specialization-wise)
- Click “Manage Subjects” button for the Corresponding Class.
- Fill the “Add New Subject” Form
 - Select Subject S.No.
 - (Please refer to Academic Syllabus for Subject S.No.)
 - (All Courses of an Elective will have same S.No.)
 - (For shared lab courses, all groups for a course will have the same S.No.)
 - Enter Subject (Course) Code
 - Enter Full Name of the Subject (Course)
 - Enter Short Name of the Subject (Course) – used for reference only
 - Select Type of Subject/Course
- Click on “Add Subject”
 - Message: “Subject added successfully.” will be displayed.

Steps to Map Faculty to a Course in a Class (by HOD)

- Select “Manage Classes” option from the Menu
 - This page will show the List of all Active Classes (Specialization-wise)
- Click “Map Faculty” button for the Corresponding Class.
- Fill the “Map Faculty to Subject” Form
 - Select the Subject (From the List of Added Subjects/Courses)
 - Select the Faculty (From the List of Faculty)
 - Faculty can be chosen across all the departments of the college
 - (List is arranged as follows: First, the List of Faculty of the same department are displayed, then Faculty of Humanities and Sciences Department will be displayed, Later Faculty of Other Departments will be displayed)
 - Click on “Add Mapping” Button
 - Message: “Mapping added successfully.” will be displayed.

Steps to Map Students to a Course in a Class (by HOD)

- Select “Manage Classes” option from the Menu
 - This page will show the List of all Active Classes (Specialization-wise)
- Click “Map Students” button for the Corresponding Class.
- Fill the “Map Students to Subject” Form
 - Select the Subject (From the List of Added Subjects/Courses)
 - Click on “Show Students” Button.
 - List of Unmapped Students and List of Already Mapped Students will be displayed for the selected course.
 - To Map the Students for the selected course,
 - Select all the Students from the “List of Unmapped Students”
(To select multiple students, use shift+ up/down arrow from keyboard or CTRL/Shift key + mouse-click)
 - Click on “Map selected Students” Button.
 - After Submitting, Students will be displayed in the “List of Mapped Students”

Steps to Create Timetable for a Class (by HOD)

Step 1: Access Timetable Management

1. Select "**Manage Classes**" from the menu
2. Locate the class for which you want to create the timetable
3. Click "**Manage Timetable**" button for that class
4. The Timetable Management page will display with:
 - Class name and specialization at the top
 - Statistics cards showing timetable summary
 - Add Timetable Entry form
 - View tabs (Subject View / Grid View)

Step 2: Add Timetable Entry

Fill the "**Add Timetable Entry**" form with the following fields:

a) Select Weekday (Required)

- Choose the day from dropdown: Monday, Tuesday, Wednesday, Thursday, Friday, Saturday

b) Select Time Slot (Required)

- Choose from available time slots (e.g., "Hour-1: 9:00 AM - 9:50 AM")
- Time slots are predefined by the institution

c) Select Subject (Required if Activity Name is empty)

- Choose from the list of subjects already added for the class
- Format: "Subject Code - Subject Full Name (Subject Type)"
- Example: "210501 - Operating System (Theory)"

d) Enter Activity Name (Required if Subject is not selected)

- For non-academic activities like Library, Sports, Break, Lunch, etc.
- Use this field when the period is not for a regular subject
- Examples: Library, Sports, Games, Break, Lunch, Assembly, Mentoring

e) Select Building Name (Required)

- Choose from dropdown list of available buildings:
 - CCC
 - Lecture Hall Complex
 - Main Building
 - Department buildings (ECE, CSE, EEE, Civil, Mechanical, Chemical)
 - Science Block
 - Library

f) Select Room/Hall Name (Required)

- This dropdown is **dependent on Building selection**
- First select a building, then the room list will be populated automatically
- Examples:
 - Lecture Hall Complex: LHC-101, LHC-201, LHC-301, etc.
 - Main Building: LH-01, LH-17, LH-19, etc.
 - Department buildings: Department, Dept Lab, etc.

g) Click "Add Entry" button

Step 3: Handle Validation Messages

After submitting, you may see one of these messages:

Success Messages:

- "Timetable entry added successfully" (Green alert)
- The entry will appear in the timetable view below

Error Messages:

- **"Weekday, Time Slot, Building Name and Room/Hall Name are required!"**
 - Fill all mandatory fields
- **"Either select a Subject or enter an Activity Name"**
 - You must select a subject OR enter an activity name (at least one is required)

- **"Time slot conflict! This class already has a subject scheduled at this time."**
 - The selected time slot is already occupied for this class
 - Choose a different time slot or day
- **"Room conflict! [Building] - [Room] is already booked for [Other Class] at this time."**
 - Another class is using that room at the same time
 - Choose a different room or time slot

Viewing the Timetable

Subject View (Default)

Shows timetable organized by subjects:

- Each subject displayed as a card with subject code, name, and type
- Lists all periods scheduled for that subject
- Shows: Weekday, Time slot (with start and end time), Building, and Room
- Displays count of periods per week for each subject
- **Other Activities section** shows non-subject activities (Library, Sports, etc.)

Use Subject View to:

- Verify all subjects are scheduled
- Check how many periods each subject has per week
- Identify which rooms are used for each subject

Grid View

Shows traditional weekly timetable grid:

- Rows: Days of the week (Monday to Saturday)
- Columns: Time slots (Hour-1, Hour-2, etc.)
- Each cell shows:
 - Subject Code

- Subject Type badge (Theory/Lab)
- Building and Room location
- **Color coding:**
 - Blue border: Theory subjects
 - Green border: Lab subjects
 - Dashed gray border: Free periods

Use Grid View to:

- Get a complete weekly overview
- Print or export the timetable
- Identify free periods
- Visualize the daily schedule

Steps to Delete a Timetable Entry

Method : From Subject View

1. Navigate to **Subject View** tab
2. Find the subject and specific schedule entry to delete
3. Hover over the schedule row (a delete button will appear)
4. Click the **trash icon** () button
5. Confirm deletion in the popup dialog
6. Message: "Timetable entry deleted successfully" will appear
